

# BLUE BRANCH SERVICES

## NATIONWIDE IP BASED INFRASTRUCTURE BRANCH SERVICES

### THE CHALLENGE

Deploying technology on a large scale under a short duration can present many challenges to OEM's, Integrators and End-Users. At BlueWater, we embrace such challenges by providing comprehensive processes and methodologies that enables us to deliver a cost competitive program at the highest level of quality.

### THE FEATURES

- ◇ Ability to turnaround an intelligent deployment schedule within 48hrs.
- ◇ Ability to deploy qualified, vetted resources under strict SLA's
- ◇ Ability to provide powerful program data to client while deployment is under way to insure program objectives are being met.

### OUR APPROACH

- \* Execute repeatable tasks that are proven, efficient and extremely scalable to meet client demands.
- \* Insure our system tools compliment our horizontal delivery approach
- \* Perform ongoing analysis of program performance with commitment to modify, adapt and replicate best practices where necessary

### OUR EXPERIENCE

- \* Combined 50+ years of experience successfully managing large scale deployments and short term service events
- \* We know how to bring people, process and tools together while executing under best practices and methodologies.

With a focus on quality assurance, BlueWater stands prepared to offer comprehensive training programs and qualitative customer feedback results to insure customer satisfaction is being achieved.

### WHY BLUEWATER?

The BlueWater team is comprised of some of the best IT Services talent in the U.S. From sales, to engineering, to project management and the operations structure that support the program, BlueWater is a team of "A" players with a history of delivering a high level of excellence to its Clients and Partner's . We offer a high quality, cost competitive program, on a nationwide basis with proven ability to implement varying technology under strict SLA's and project timelines.
